PROFESSIONAL SUMMARY

Electrical/Instrumentation Engineer (B.Sc., University of Nigeria) with hands-on experience in P&ID design, QA/QC, technical documentation, and data management in the Oil & Gas sector. Cisco-certified (CCNA) with a strong foundation in networking and cybersecurity fundamentals. Experienced AI technical evaluator and data annotator with demonstrated accuracy in content review, structured data entry, and instruction-following. Actively positioned for remote roles in AI evaluation, technical support, SOC analysis, and cybersecurity — combining engineering precision with digital-native versatility.

CORE COMPETENCIES

- AI Content Evaluation & Quality Review
- Data Annotation & Labeling (Text, Image, Document)
- Technical QA/QC & Compliance Review
- P&ID Design & Engineering Drawing (AutoCAD)
- Instrumentation Datasheet Preparation
- Engineering Report Writing & Formatting
- Cybersecurity Fundamentals (CCNA-level)
- Network Monitoring & SOC Support
- Excel Dashboards & Data Management
- Cisco Packet Tracer & Network Simulation
- Web Research & Information Verification
- Technical Writing & Documentation

PROFESSIONAL EXPERIENCE

Blue-Ivy Consulting Limited

Senior Instrumentation Engineer

April 2025 – Present

Project: P&ID Design, AI Training Support & Technical Documentation

- Designed and drafted P&IDs and electrical drawings using AutoCAD, applying precise labeling, annotation, and component tagging — skills directly applicable to AI data annotation and technical review tasks.
- Prepared and maintained instrumentation datasheets, equipment registers, and engineering specifications with zero-error accuracy standards.
- Evaluated engineering design documents against defined criteria, performing rule-based QA/QC — analogous to AI content moderation and output evaluation workflows.
- Conducted structured technical research and compiled findings into formatted engineering reports, demonstrating rigorous information verification skills.
- Produced Weekly Activity Reports and Monthly Progress Reports, maintaining consistent documentation standards across project deliverables.

Electrical Engineer Intern – Industrial Training

January 2024 – April 2024

Project: Alternative Pipeline Evacuation – Oloma to Bonny Terminal

- Supported QA/QC reviews of engineering drawings and design documents, checking compliance against technical standards — transferable to AI output evaluation and content quality assurance.
- Assisted in structured data collection across Electrical Maintenance and Protection Control & Metering departments, maintaining accurate project records.
- Drafted and maintained engineering documentation including Preventive Maintenance Schedules and project progress reports.

BW Offshore

E&I Trainee

July 2022 – October 2022

- Assisted senior engineers with maintenance inspections and updated technical manuals and maintenance logs, building strong data entry and record-keeping discipline.
- Collaborated across mechanical and process engineering teams, developing cross-functional communication skills in a precision-critical environment.

CERTIFICATIONS & EDUCATION

Cisco Certified Network Associate (CCNA)

2024

Networking, IP addressing, routing & switching, network security fundamentals, Cisco IOS, Packet Tracer lab exercises.

B.Sc. Electrical Engineering

2024

University of Nigeria, Nsukka | Relevant: Power Systems, Control Systems, Computer Programming, Electrical Machines

TECHNICAL SKILLS & TOOLS

- Engineering Software: AutoCAD, Dialux, Proteus, Multisim, Cisco Packet Tracer
- Productivity & Data: Microsoft Excel (dashboards, data analysis), Word, PowerPoint — Advanced
- Cloud & Collaboration: Google Workspace (Docs, Sheets, Drive), internet research platforms
- AI & Annotation Platforms: Toloka, Mindrift, Welocalize, Mercor (applied/registered)
- Cybersecurity: Network monitoring concepts, OSI/TCP-IP model, basic vulnerability assessment

PORTFOLIO SAMPLES

Available at: [Portfolio Link — <https://ebukajosiah-sys.github.io/ebukajosiah.github.io/>]

- Instrumentation Datasheet — sample spec sheet for a pressure transmitter (ISA format)
- Excel Dashboard — engineering KPI tracker with charts and dynamic filters
- Technical QA/QC Checklist — document review checklist based on oil & gas standards
- Engineering Report — formatted progress report sample (executive summary, findings, recommendations)
- P&ID Review Sample — annotated P&ID review with markups and compliance notes
- Cybersecurity/Networking Lab Notes — Cisco Packet Tracer lab walkthrough and network diagram

LANGUAGES

- English — Fluent (Reading, Writing, Speaking)
- Igbo — Conversational
